

TRUE BALLISTIC CHRONOGRAPH

THE CHRONOGRAPH THAT JUST WORKS

Imagine a chronograph that always works and that gave the actual ballistic coefficient of a round through multiple velocity readings; all in a compact portable package. No external triggers, tripods or external power needed, just a fool proof set up with all the information you will ever need for an accurate and true ballistic calculation.

TRUE BALLISTIC CHRONOGRAPH

The True Ballistic Radar Chronograph measures actual speeds at four different velocities readings from 0 - 300 yds to determine actual ballistic coefficient using G1/G7 drag models. This provides actual data in your conditions, info that provides the difference between a hit and a miss. What's it worth to you to hit your target?

- No External Recoil Trigger Required
- No External Battery Pack Needed
- USB-C Rechargeable Internal Battery
- Small & Portable at 1.8lbs, 7.4" x 9.6"
- Radar Tech Works Rain or Shine
- Large LCD Display Screen
- Optional Bluetooth Phone App
- Measures from 400 - 4,000+ fps
- Determine Actual Ballistic Coefficient
- Shows STD Deviation and Spread
- Indicates Subsonic Yardage
- Accurate Data Avoids Costly Misses
- Select G1/G7 Drag Models
- Signal Strength / Interference Indicator
